(54) Title: IDENTIFICATION OF ENCODED BEADS

CCD detection

Quartz flowcell with teflon filling

CDD detection system: The 3 CCD detector
plates are positioned on orthogonal axis in
Cartesian co-ordinate system around the flow
cell

(57) Abstract: The present invention is relates to methods for the identification of spatially encoded beaded or granulated matrices comprising a plurality of immobilised particles. The identification is based on a distance matrix determination or based on a set of geometrical figures, such a triangles, on the basis of which individual matrices can be determined.
